

ABSODAN PLUS

Binding agent for oil and chemicals

With large success for years in use

Made of environment-friendly, mineral natural products

- special oil binder, category type III/R*)
- fine grained, particle size 0,5 to 1 mm
- With very high and rapid absorption
- Particularly suitable for garages and road
(Absorption of the hazardous remaining quantity of oil in the depressions)
- packed in plastic-valve bags a 20 kg/40 l
- packed weight ca. 550 g/l
- absorption ca. 19 l per bag

*) Criteria of suitability, published by Department of Environment:

type III – Oil binder for special cases of need, in particular in trade and industry. These oil binders do not have to be water-repellent.

type R – R is an additional appellation, it means the aptitude and accreditation for circulation areas.

The aptitude of the oil binder for the indicated types is documented by ministerial certification reports.
